2 Installation and upgrade instructions

Please consider the following notes with regard to previously installed versions of OmniView, previously named PrintView up to release 3.2.

Please also refer to the OmniView User Manual for general information about the installation process.

1. Uninstall any previous version of OmniView/PrintView before installing the current release.
2. If you have an existing license file for a former version of PrintView, it cannot be applied to the new OmniView installation. Therefore, please contact Automic or apsware support to obtain a new license file.
3. If you have an existing license file for a former version of OmniView (V4.x), it can be applied to the new OmniView installation.
4. MSI installer version 3.1 is required.
5. Microsoft .Net runtime Version 3.5 SP1 is required.
6. The license file 'OmniView.lic' will not be provided by the installation; it must be requested from Automic or apsware support or use a backup (see point 3).
7. Installation has been tested on Windows 11 64bit (German), Windows 10 64bit (German), Windows Server 2019 Standard (English), Windows Server 2016 Standard (English), Windows Server 2008 R2 Standard (English) and Windows Server 2022 (English).

3 Product Documentation
